ONE OF OUR IRIS FIELDS.

FOREWORD

WHETHER you are interested in landscaping a large estate or in having a small but attractive garden, we think that you will find Iris one of the most valuable plants that can be used. It is a perennial, requires but little care, and furnishes flowers of wonderful beauty over a long period. Many of you are aware of this and already have fine collections.

We extend you a cordial invitation to visit our Exhibition Gardens. You will see there many varieties which we do not yet list. We are each year adding many of the newer introductions to our collection.

There are usually some varieties in bloom at all times of the year, but of course the real display is in the spring. The earliest of the tall growing bearded varieties start to bloom in February, but it is not until the latter part of March that the general onrush begins. Probably the height of the display of the bearded varieties is reached in April but frequent visits to the Gardens are well repaid during March, April and May.

We offer our services in helping work out any of your planting problems and will submit plans or, if you wish, can offer suggestions regarding any tentative ones which you have made. We make no charge for this service.

As our season of blooming is advanced six weeks or so ahead of that in the Eastern United States, it allows us to ripen the rhizomes in our rainless summer and send them East in time to become well established for the following spring. Many of our Eastern customers realize the advantage which this is to them.

To our neighbors here in Southern California we can furnish Iris at any time of the year.

C. S. MILLIKEN
R. E. WINCHESTER

Read Before Ordering

The prices quoted herein cancel all previous quotations made either by letter or in printed lists.

Prices include delivery anywhere in the United States on orders of not less than \$2.00 in value, provided such orders are placed in the summer or fall, when stock is in the best condition for shipping.

Six plants will be furnished at dozen rates only where quoted by the dozen. Price per hundred, or in larger quantities, quoted on application.

Terms: Cash with order.

Important Note: We exercise due care to keep all varieties TRUE TO NAME, and hold ourselves in readiness at any time to replace, on proper proof, any stock that may prove otherwise. All sales made subject to stock being unsold when order is received, or loss by any and all unavoidable causes.

We are often asked if our Irises are hardy in colder climates. We ship them all over the United States with perfect satisfaction, and have repeat orders from the same customers year after year. Our stock has a long growing season, and owing to our climate it becomes ripened so that it will ship well anywhere with no danger of rot.

We are always ready to give our advice, if asked, as to varieties best adapted to certain localities and conditions, and to quote net prices for collections.

(POGONIRIS)

The letter "S" represents the three upright petals or standards, and "F" the three lower petals or falls in the following listed varieties:

ABENDA (Perry).	Old rose, bronze, and crimson, free flowering.	4 ft.	\$ 2.50	
ACHERON (Sturt).	A rich pansy violet with fine carriage. Free flowering.	3 ft.	3.00

OCHROLEUCA SULPHUREA. p. 22.	
OLD IVORY (Sturt.). A soft light yellow. 3 ft.....	3.00
OLYMPUS (Perry). S. rose and bronze; F. a red-purple. A fine variety. 4 ft.....	3.00
OPERA (Vilmorin). A very rich purple. A beautiful flower. 2 ft.....	.75
*OPHELIA. S. white, heavily frilled and shaded blue; F. white, frilled soft blue, large flower.....	.25
ORANGE QUEEN. Dwarf. A good yellow.....	2.50
*OSIS. S. very light lavender; F. velvety-purple. Medium height.....	.25
*OTHELLO (Syn. Sappho). S. rich blue; F. very dark velvety purple. Rich and handsome. 30 in.....	Dozen \$2.50
PALAUREA (Sturt.). Lavender with a yellow glow. 3 ft.....	1.00
PANCROFT (Mil.). Soft cream.....	.35
*PALLIDA. S. lavender; F. lavender with rosy tinge. Deliciously scented. 3 ft.....	Dozen \$2.50
PANDORA (Sturt.). A pale pink of merit. 2 ft.....	.50
*PARISIANA. White. Heavily dotted and lined purple.....	.50
*PAULINE (Farr.). Rich pansy-violet with orange beard. 3 ft.....	.35
*PERFECTION. S. light blue; F. dark velvety violet black. Very handsome. 2 ft.....	Dozen \$2.50
PERLADONNA (Perry). An attractive blue-lavender. 3½ ft.....	2.00
PHYLLIS BLISS (Bliss). A rose-lavender, large flowers, free blooming. 3 ft.....	.66
*PLUMERI. S. coppery rose; F. velvety claret.....	Dozen \$2.50
POLARIS (Sturt.). A tall dark violet. 3½ ft.....	1.50
PONT-A-MOUSSON (Millet). A very large reddish bicolor. 4 ft.....	.75
PRIMROSE (Sturt.). Generally acknowledged to be one of the finest yellows yet produced. 30 in.....	8.00

A row of Mesopotamica is splendid

PRINCE CHARMING (Sturt.). White frilled and tinted with pink. Generally admired. 3 ft.....	3.00
* PRINCESS BEATRICE (Barr). A wonderfully beautiful form of <i>Pallida Dalmatica</i> . Much incorrectly named stock is sent out under this name. We have the true variety. 3½ ft.....	.75
* PRINCESS VICTORIA LOUISE (G. and K.) S. lemon yellow; F. deep violet blue; white edge.....	.25
PRINCE LOHENGRIN (Mohr). Like Lohengrin but taller.....	1.00
PROSPER LAUGIER (Verdier). S. light bronze-red; F. velvety ruby-purple. Orange beard. Handsome.....	.35
PROSPERO . (Yeld). Lavender standards and deep violet falls. Stalk well branched. Good.....	1.00
PSEUDACORUS . p. 23.	
PURPLE LACE (Sturt.). Deep blue-purple except for the white haft which is laced with purple. 3 ft.....	1.50
PURPUREA . p. 21.	
* QUAKER LADY (Farr). A blend of lavender, old gold, and blue. Attractive35
* QUEEN ALEXANDRIA . S. fawn, shot with lilac; F. lilac. 2 ft.....	.35
* QUEEN CATERINA (Sturtevant). Pale lavender violet self. Late....	.75
* QUEEN OF MAY . Soft rose-lilac.....	.25
RAFFET (Vilm.). Two shades of violet, the falls reticulated. 3 ft....	.75
RAJPUT (Sturt.). A violet self of fine form and substance, falls flaring. 3½ ft. We enjoy the perfection and charm of this iris.....	2.50
RAMONA (Mohr). Petunia violet flushed with brown. Hardy and vigorous	1.00
RANGOON (Sturt.). A large flowered violet. 2 ft.....	1.00
RED SPENDOUR (Sturt.). A low growing rich purple. 20 in.....	2.00
REVERIE (Sturt.). Red, buff, and pink. Fine form and substance. Late blooming. 40 in.....	5.00
RHEIN NIXE (G. and K.) S. white; F. mauve, edged and reticulated white. Very distinct. 30 in.....	.35
RIALGAR (Sturt.). S. yellow; F. brown. This should find a place in every garden. 2 ft.....	3.00
* RICARDI . Eastern species, similar to the one we list as <i>Mesopotamica</i> , but segments not quite as broad. Both used for hybridizing, on account of the large size of the flowers and sturdy growth. Early and tall.....	1.50
* RICARDI FONCE (Denis). Light violet, deepening in falls to Bradley's violet. A very large flowered variety carried on tall branched stems. Very early. A fine landscape variety.....	.50
* RICKOCHII . Coloring similar to <i>Nuee d'Orage</i> , but a more attractive flower with crimped standards. Late bloomer.....	1.50
rita (Mohr). A blue purple self. well branched and early.....	.75
* ROMEO (Millet). S. colonial buff, deepening at base to amber yellow and dotted brown; F. lavender with unique markings of reddish purple50

Lift and separate iris when crowded, about every three years

ROBT. WALLACE (Perry). This is a favorite of ours. The falls are a very deep rich purple, the standards a deep violet. Greatly admired by all of our visitors. Late. Often blooms in winter in California and again in spring. 3½ ft.....	5.00
ROSADO (Mohr). A beautiful clear pink. Large flowers, vigorous, and hardy. 3½ ft. Excellent	4.00
ROSALBA (Bliss). One of the reddest. Effective in mass. 3 ft.	1.50
* ROSALIND (Bliss). A rosy lavender. Late flowering. 3½ ft.7
ROSE MADDER (Sturt.). A beautiful flower, the falls rich and velvety purple, the standards brighter. Late. 3½ ft.	3.00
* ROSEWAY (Bliss). A reddish tone of Pallida type.....	.50
SALONIQUE (Cayeux). Pale yellow standards and violet falls. Rather unique	1.00
* SAN GABRIEL (Dean). Large, fragrant flowers of lustrous lavender flushed with rosy mauve. Stems strong and well branched. 4 to 5 ft. high. We have had stalks 6 feet high. Very early. Single clumps have bloomed continuously for 8 weeks. The foliage is green all winter, the best foliage of any iris in our garden. We consider this one of the finest irises in cultivation for the milder climates.....	2.50
SANTA BARBARA (Mohr). A very fine lavender blue, large horizontal falls, well branched stems. Early. 3½ ft. Excellent	5.00
Just barely cover the rhizomes of bearded iris	

SAN GABRIEL.

SANTA MONICA (Dean). A pink-purple and lavender bi-color with very large flowers borne on 4 ft. stalks. Blooms very freely over a long period. Of Mesopotamica habit.....	2.00
SARABANDE (Sturt). An attractive blend of cream and violet. 2½ ft.	.50
SARPEDON (Yeld). S. bluish-violet, F. a deeper violet. Vigorous. 3½ ft.50
*SAVIGNON (Millet). A squalens variety, blend of violet, dahlia, purple, and yellow.....	1.00
SEMINOLE (Farr). A brilliant violet-crimson flower with orange beard. Cert. of merit, Amer. Iris Society, Phila. 1920.....	.50
SHALIMAR (Foster). Resembling Trojana but lighter in color. Early	.75
SHEKINAH (Sturt). A soft yellow of pallida habit. 3 ft.....	1.00
SHERBERT (Sturt). A much admired combination of ecru and purple. 4 ft. Vigorous.....	.75
SHERBERT 2nd (Sturt.). A cross of Sherbert and Alcazar. Rich carmine and ecru. 3½ ft.....	3.00
SIBERICA. p. 23.	
SIMONE VAISSIERE (Millet). The falls are analine blue, the standards a lustrous bluish white. Tall. An iris of outstanding merit.	2.50
*SINDJKHA (Sturt). Dull lavender and buff, splendid habit. 4 ft.....	.75
*SIWAS. S. violet-blue; F. violet-black. 30 in. Very early. Doz. \$2.50.	.25
SNOW CUP (G & K) Dwarf. Pure white and very floriferous. Per doz.	3.50
SNOW WHITE (Sturt). "As pure white as White King, even the markings are pale green which gives it a delightfully fragile appearance. Good form, size, and substance; over 3 ft." Miss Sturtevant's description	15.00
SOLEDAD (Mohr). A beautiful pale yellow self. Early and hardy.....	1.00
SOUV. DE LOETITIA MICHAUD (Millet). A wonderfully fine light blue iris carried on four-foot stalks. Particularly recommended for California, where it has very vigorous growth. In great demand. 4 ft.	7.50
*SOUVENIR DE MME. GAUDICHAU (Millet). A vigorous plant, carrying large flowers of good substance on a nearly 3 ft. stem. The standards are Bradley's violet, the falls somewhat deeper in color and velvety. A very handsome flower. One of the finest irises....	1.00
*STAMBOUL (Foster). After Caterina type but darker. A good iris...	.50
SUSAN BLISS (Bliss). A beautiful pinkish-lilac, one of the very best. 3½ ft.	2.00
SUSIANA. p. 19.	
STYLOSA. p. 22.	
STOLONIFERA. p. 20.	
SPANISH IRIS. p. 23.	
SWEET LAVENDER (Bliss). A rose-lavender flower with horizontal falls. It is distinct and charming. 3½ ft.....	1.50
*SYPHAX (Bliss). S. mauve; F. red-purple. Good in California because of winter blooming habit.....	.75
TAJ MAHAL (Sturt). A very vigorous, tall, pure white. 3 ft.....	3.00

In heavy soils plant Bearded Iris on ridges.

* TAMAR (Bliss). A lavender-violet, falls darker than standards, vigorous and free flowering.....	.75
TANCRED (Sturt). A buff and purple combination which is different. 2½ ft.	3.00
TENEBRAE (Bliss). One of the famous "Dominions." It is a very rich deep purple of fine form. 3 ft.....	7.50
THESEUS (Hort.) A creamy white deepening to yellow in the throat. Very beautiful and especially recommended for California.....	6.00
THUNDER CLOUD (Sturt). A grayish lavender, as the name would imply. 2½ ft.50
TID-BIT (Sturt). A low growing lavender excellent for the border. 15 in.75
TIMUR (Sturt). Velvety purple falls which are lighter at the margin. Substantial and pleasing. 2½ ft.....	3.00
TINGITANA . p. 23.	
* TINTALLION (Sturt). Small but has distinction. White shading to deep purple at ends of falls. 2 ft.....	1.00
* TITAN (Bliss). Violet-blue, falls flaring and darker than standards. Very sturdy grower and considered valuable for hybridizing purposes	4.00
TOM-TIT (Bliss). A wonderfully fascinating flower for the border. A dark violet, free blooming variety which wins one at first glance. 1½ ft.50
* TROOST (Denis). One of the best penciled pink irises.....	.75
TRUE CHARM (Sturt). White with lavender tracing. Part of its attractiveness lies in its carriage and form. 3½ ft.....	2.00
TRUE DELIGHT (Sturt). This is one of the finest flowers we have ever seen. Pure white with deep rose styles. It must be seen for its full beauty to be realized. 3 ft.....	5.00
* TUNISIE (Millet). Tall, with smoky standards of deep heliotrope, aniline-yellow and slate violet; F. velvety litho-purple.....	1.00
TYRIAN (Sturt). A vivid deep claret. 3 ft.....	5.00
VALERY MAYET (Denis). Rich mahogany flower of small size. Beautiful things are not necessarily large. 3 ft.....	1.00
VALKYRIE (Sturt.). A stern iris, powerful and impressive. Olive and dark purple. 3 ft.....	4.00
VIRGINIA MOORE (Shull). A yellow self, one of the best for California.	1.00
WILD ROSE (Sturt). Colored as the name indicates. A very attractive flower	1.00
WILLIAM MARSHALL (Perry). Dark mauve of Pallida habit. 3 ft....	1.00
* WYOMISSING (Farr). S creamy white; F. deep rose at base, shading to flesh-colored border. 20 in.....	.50
YELLOW MOON (Sturt). A soft yellow of pallida habit. 3 ft. Very desirable.	3.50
YLO (Sturt). A dwarf lemon yellow with flaring falls. Flowers early. 4 to 10 in.....	1.00

Try Kharput with San Gabriel.

ZOUAVE (Vilmorin). White with violet and blue markings and shadings Early

1.00

ONE OF THE REGELIAS.

ONCOCYCLUS

The varieties of this group are natives of Asia Minor and Persia where the summers are rainless. They start to grow with the fall rains and grow throughout the winter. Susiana grows well in California and is being successfully grown by many amateur gardeners in other parts of the country. It has to be given winter protection in the colder sections and has to be lifted in sections which have summer rains. Grow in full sun in warm location. Likes lime.

***IRIS SUSIANA** (The Mourning Iris). A wonderful flower of large size, borne on 12 inch stems. It looks as if it were almost black, flecked with grey. In reality it has purple-black veining and spotting on a grey ground. The standards are somewhat lighter than the falls.

Fall delivery only. \$10.00 a dozen..... 1.00

REGELIA

This group of bearded iris is closely related to the Oncoculus group but is much easier to grow. It includes some of the most beautiful of all irises and will be much more extensively grown when better known. The rhizomes must be kept dry during the summer, either by lifting or being placed where they get no irrigation. Growth does not start until late winter or early spring.

Keep Susiana and the Regelias dry in summer.

HOOGIANA. Native of Turkestan. The late Mr. Dykes, the leading iris authority, thinks that "Iris Hoogiana is perhaps the most aristocratic of all irises. There is a grace and distinction about the large flowers of uniform color, set off by the bright golden beard, which is not found even in the best pallidas." Color, pale grey-blue. 1½ ft. Fall delivery only.....	2.50
STOLONIFERA. Native of Russian Turkestan. Those who see it stand and admire. The finest things cannot be described. Flowers shot with "electro-blue." Falls and standards wavy. Fall delivery....	2.50

EVANSIA

(The Crested Iris)

JAPONICA. Native of Central China and Japan. The foliage is evergreen. The flowers are borne in large numbers on 2 to 3 ft. branching stems. Pale blue brightened with yellow. Segments wavy. Give partial shade and more water than for bearded iris 35

TECTORUM. Native of Central China. Is grown on the thatched roofs in Japan. Flowers much larger than Japonica, blue-purple with conspicuous white crest on falls. 15 in. 50

APOGON

(Beardless Iris)

AMERICAN SPECIES

The varieties of this group are quite different in appearance from the bearded iris. The leaves are blade-like and in California are green all winter. The flowers, in contrast to the bearded iris, are flat. They can stand more water than the bearded varieties and do well in partial shade. They are particularly effective in borders and around pools.

Plant iris in bold clumps against the shrubbery

IRIS STOLONIFERA.

DOROTHEA K. WILLIAMSON (Williamson). A hybrid of fulva and foliosa. The flowers are large and are very brilliant velvety purple borne on 30 in. stems. A fine cut flower. Hardy..... .75

FOLIOSA. This is much like Hexagona except reduced in height. Color, blue. Height 12 in. Native of Southern United States75

***FULVA.** Flowers bright terra cotta on 18 in. stems. No other iris of this brick red color known. All six segments slightly drooping. Native in South but is easily grown in the northern United States. Flourishes in California75

***HEXAGONA.** A striking tall blue Iris which makes a beautiful combination with the yellow Spurias. Flowers in late April and early May in California, 3 to 4 ft.50

SPURIAS

PURPUREA. A raisin purple hybrid.50

(We ship these in the fall only. We can move them locally at other times of the year.)

The Iris in this group should be grown much more extensively than they are at the present time. The flowers last for a long time and the buds keep opening after cutting. In shape the flowers are almost identical with the Dutch and Spanish Iris and are as easy to handle without injury. The flower stalks, however, are from 4 to 6 feet high. The foliage is sword-like, as in the preceding group, but dies down during

A SPURIA.

Under trees in California plant Hexagona, Fulva, Japonica.

the winter. The plants are very effective in the border where they make large clumps.

* AUREA. A tall deep yellow. In California it is at the peak of its blooming period the last part of April or early in May. We recommend planting groups of six or twelve rhizomes. Somewhat later than Ochroleuca75
MONSPUR. A tall, light bluish purple.....	1.00
MONNIERI. Soft primrose yellow. Segments somewhat broader than in Aurea	1.00
* OCHROLEUCA. White with a yellow patch on the falls. Tall and effective	\$.25
* OCHROLEUCA SULPHUREA. Similar to the preceding but cream instead of white. Very beautiful.....	.50

UNGUICULARIS

A more euphonious name by which this group is often known is that of Stylosa. While scientifically we must talk of unguicularis, because this name was given first, in our gardens may we not grow stylosa? The garden use of the iris in this group is reserved for those who live in the milder climates.

The plants start blooming in the fall and bloom throughout the winter. They grow wild in Algeria, Greece, and Asia Minor. The foliage is grass-like and the flowers are borne on stem-like parts, really elongated perianth tubes, 8 to 16 inches long. The flower is one of great refinement and is delightful in the house.

Plant preferably from August to December. We do not advise planting later than February except in balled clumps.

* STYLOSA. Lilac blue with grassy evergreen foliage. Dozen \$2.5025
--	-----

* STYLOSA MARGINATA. A form of bluer hue and somewhat broader foliage than above. Makes a very rank growth. Dozen \$2.5025
---	-----

* STYLOSA ALBA. A white form. Dozen \$2.5025
---	-----

STYLOSA SPECIOSA. A violet form, narrower foliage and somewhat smaller flower and shorter perianth tube75
--	-----

QUEEN ELIZABETH. A dwarf form, violet and white. Very floriferous	1.00
--	------

A NATIVE CALIFORNIAN

Cut back Stylosa foliage in July or August

XIPHİUM GROUP

The iris of this group have bulbs, not rhizomes. We ship from August to the middle of November. Not less than six of a variety except in our mixture.

IRIS TINGITANA. Fall delivery. This is a different species from the

Spanish and Dutch Iris, L. Xiphium, but belongs to the same group. It is the largest and finest of the entire group. The blades are a light blue with a central ridge of deep orange-yellow. The standards are a light blue-purple. For milder sections of the United States only. Fine in California. Large bulbs.....Dozen

2.00

IRIS XIPHİUM. These are the irises so much in evidence in flower shops around Easter time and earlier. The Dutch are taller, larger flowered, and bloom two weeks earlier than the Spanish. In general appearance they are much alike.

DUTCH IRIS

(Large bulbs. Fall delivery)

IMPERATOR. A large blue of very intense color. One of the finest varieties.Per dozen

1.25

SPECIAL VARIETIES. Write for prices.

SPANISH IRIS

(Fall delivery)

MIXTURE. Good varieties. The colors in blue, white, bronze, yellow.

If you wish you may order by color and we shall try to meet your wishesPer dozen

.75

SPECIAL VARIETIES. If you have special color requirements, write for prices.

SIBERICA

The Iris in this group have grass-like foliage, which dies down in winter. The plants are free flowering and the flower stalks are tall. They prefer rich soil and plenty of moisture.

EMPEROR. Deep violet-blue, 4 ft.1.00

PERRY'S BLUE. Skyblue with horizontal falls. 4 ft.1.00

KAEMPFERI

(Japanese Iris)

We have a splendid assortment of Japanese iris. They are choice seedlings and are as yet unnamed.

We can furnish a limited number of divisions this season.

Japanese iris need an abundance of water at blooming time but not throughout the year. The flowers are large and flat, often eight or ten inches across, and are in white, blue, purple, pinks and lavenders. We ship in the fall and the spring, the latter probably being the best time to plant.

Strong divisions1.00

WATER IRIS

PSEUDACORUS GIGANTEA. Tall, deep green leaves, 3 to 4 ft. high.

Flowers yellow, on 5 ft. branching stems. Will grow in pools.

1.00

Also does well in partial shade.....

In spring water frequently the Japanese, Sibericas, Hexagonas.

OUR COMPLIMENTARY OFFER

We have marked many varieties with an asterisk. We include with our compliments:

With a \$2.50 order of these varieties any 50c iris free.

With a \$5.00 order of these varieties any \$1.00 iris free.

With a \$10.00 order of these varieties any \$2.00 iris free.

IRIS SIBERICA.

Varieties Grouped by Color

MANY of our customers wish to get a general idea of the garden values of different irises without spending time to read through the entire list carefully. To help them we have grouped many of our listed varieties into color groups. Sometimes the same variety may occur in more than one group if its colors will allow it to be used where those groups are wanted in a planting.

It would be possible to subdivide each group into sub-groups but no attempt has been made to do this as little would be gained for landscape purposes by so doing.

The great variety of color combinations in irises make any classification of this sort of nothing more than suggestive value. Color is only one of the elements which give iris character. The height, carriage, shape, substance, branching, abundance of bloom, and the character of the foliage must be considered.

WHITE, and varieties with borders or markings of other colors on a white ground:

Ann Leslie (White Standards)	Inner Glow Jeanne d'Arc	Prince Charming Rhein Nixe (White standard)
Athene	Kalif	Snow Cup
Bel-color	Kashmiriana	Taj Mahal
Beau Ideal	Kashmir White	True Charm

Crimson King	Medrano	Timur
Dallila	Mestor	Tyrian
Demi-deuil	Moliero	Valery Mayet
Ed Michel	Monsignor	Dorothy K. Williamson (Beardless)
Ember	Morning Splendor	Fulva, brick red
Esplendido	Mrs. E. T. Viesseux	Purpurea
Evadne	Mrs. Hetty Matson	
Glowing Embers	Naomi	

BLUE-PURPLES, and the darker near blues and violets:

Acheron	Bruno	Garnet
Amas	Circe	Genghis Khan
Autumn King	Cyanea	Germaine Perthus
Benbow	Donna Nook	Gold Crest
Bluestone	De Guesclin	Ideal

Never use fresh manure on iris.

Joya	Stamboul	Hexagona (Beardless)
Juniata	Tenebrae	Monspur (Spuria)
Mme. Guerville	Titan	S. Queen Elizabeth
Marocain	Tom Tit	(Unguicularis)
Neptune	Wm. Marshall	Emperor (Sibirica)
Ricardi Fonce	Tectorum (Evansia)	Perry's Blue (Sibirica)
Souv. de Mme. Gaudichau	Foliosa (Beardless)	Imperator (Dutch)

A FEW CULTURAL NOTES

It is impossible to lay down any hard and fast rules regarding the culture of iris, as conditions are varied. They thrive in any soil, unless it is pure sand. When well established they should be given enough water, particularly just before and during blooming time, to keep them in good growing condition. Give good drainage and you will not have any trouble with root rot. Drainage can be secured in heavier soils by planting on ridges,

If the soil is poor and needs fertilizing, bone meal can be used or, in California, a light application of blood or tankage. Bearded iris like lime. Lime is particularly beneficial on heavy soils as it flocculates these soils and improves the drainage. Barn yard fertilizer, if used at all, must be well decayed and thoroughly worked into the soil.

Transplanting may be done at any season, but the best time, if one cares to keep watered sufficiently to start the new growth, is when they go out of bloom, otherwise the fall is better. Do not overwater, however, so that they will become water-logged and decay. If too dry they are likely to shrivel even if they do not die.

Do not plant deep, barely cover the rhizomes.

Some varieties should be divided every two years—others every three or four. Give the rhizomes room for the side shoots to get a foothold.

The variegatas and a few others of the bearded varieties do better, that is make longer flowering stems, if given a soil with plenty of humus.

Give the Stylosa the same treatment as the Bearded varieties, and after the first year cut the foliage down close to the ground the latter part of July or August. The flowers will show to better advantage and abundant fresh leaf growth will appear.

Do not transplant Stylosa in spring or summer. New root and leaf growth starts at the beginning of the flowering season.

The beardless varieties prefer a rich soil with humus and plenty of water. The Spurias, however, give very satisfactory results when treated the same as the bearded varieties.

The Crested varieties do better in partial shade with a rich soil and liberal moisture.

Sibiricas must have moisture all of the year and will not thrive with the treatment usually given the Bearded ones.

The native varieties of this coast when established do not require moisture during the dry season. Transplant either in the fall or spring. The replanting of this stock after it has made two or three years' growth is rather hazardous

We should plant more Spurias.

and success depends largely upon the season. Artificial watering does not seem to have the same effect as the natural rains.

All irises bloom better in full sun unless it is a very few like the crested. Partial shade, however, suits them well.

The above applies more particularly to culture in Southern California, but much of it also applies to any location.

The American Iris Society sends interesting bulletins to all of its members.

The annual dues are only \$3.00. You are eligible to membership.

Send check to Mr. J. B. Wallace, Jr., 129 Church St., New Haven, Conn.
